FOR IMMEDIATE RELEASE

LED COR CONSTRUCTION EARNS ECO CAROLINAS CERTIFICATION

CHARLOTTE, North Carolina – February 18, 2010 – Leducor Construction Inc., has earned Eco Carolinas Certification “Leader Level” status for their Charlotte Regional Headquarters office.

Russ Partin, Regional Manager, Leducor Construction

“It’s exciting to receive the Eco Carolinas Certification,” said Russ Partin, Regional Manager for Leducor Construction’s Southeast Regional Construction office. “Leducor is a leader in responsible construction practices and now our Charlotte office reflects the same commitment to the environment.”

Partin’s team has extensive experience in green building practices. “We have a world-class line-up of management, superintendent and administrative talent that understands the importance of responsible green construction,” Partin explained. “It’s important to us – and to businesses that consider hiring us – to demonstrate our environmental efforts. Our Southeast Regional office now reflects the same commitment we make to environmental responsibility on every job site.”

Leducor Construction builds state of the art facilities in the retail, hospitality, institutional, office, industrial, healthcare, mission critical, military and multifamily developments.

Paxton Hollar, Leducor Construction’s Director of Business Development was pleased to receive the recognition. “The Eco Carolinas Certification is another way to show that we understand the value of environmentally responsible construction. We practice what we build. We’re environmentally responsible not only in our offices but also on the job site...from start to finish.”

The Eco Carolinas Certification is achieved from successfully implementing processes focused on recycling, waste reduction, office/building environmental awareness and business-to-business practices. The Certification is based on the principles of the North Carolina Department of Environmental and Natural Resources, the South Carolina Department of Health and Environmental Control, the EPA and Energy Star.

Ledcor Construction is relatively new in the Southeast but has over 60 years of construction success stories. “Our long-term success is based on client trust. Ledcor’s proven industry experience, solid financial status and rigorous environmental practices help us convince new customers like Wal-Mart, Costco and Westin that we’re reliable and cost effective,” Partin remarked. “Our Eco Carolinas Certification helps us demonstrate one more way that we’re serious about our environmental commitment in the Carolinas.”
